

RAJWEBCONSULTING SERVER MANAGEMENT SERVICE

Why Choose Us?

- 1) We are uniquely qualified to support our own software and servers that run our software.
- 2) 24/7 access to our Support Ticket System to report any server issues.

Basic Package - \$35/mo

- Server Software Updates. (e.g., Apache, PHP, OpenSSL)
- Security System Updates (e.g., Kernel Updates)
- Troubleshooting (e.g., Overloaded Apache Server by many Website Visitors)
- Low monthly price!

Advanced Package - \$45/mo

- All Features of Basic Package
- Server Monitoring (via Munin software)
- Installation / Configuration of 5 Software Package included (e.g., FFmpeg or Apache Webserver from the Debian repo)
- Low monthly price!

Per-Case Basis - \$30-40/hr

- Pay for support only when you need it
- Includes any services provided in the Basic and Advanced Packages

Additional Information

- Client must have a Debian Linux web server, with either Plesk or ISPConfig hosting control panel installed
- The customer is responsible for file/data backups:
 - How to setup automatic backups in Plesk?
 - Read more here: [Official Plesk Documentation](#)
- This Server Management Service does not include writing/editing of website code (e.g., HTML, CSS, PHP, JavaScript).
